

Supporting Healthy Farms, Healthy Kids & Healthy Communities

# **BACKGROUND**

In 2010, Congress provided \$5 million annually in mandatory funding for the farm to school competitive grant and technical assistance program. The **USDA Farm to School Grant Program** increases the use of and improves access to local foods in schools – thus boosting farm income and economic opportunities – while also fostering experiential food education for our nation's children.

## **PROGRAM IMPACTS**

The USDA Farm to School Grant Program has helped **33,600+ schools** improve nutritious meal options made with local food for 15.3 million students, while expanding market opportunities for farmers, ranchers, fishermen and food producers. (USDA Summary of Grant Awards FY 2013-18)

Schools purchased nearly **\$790 million** in local food from farmers, ranchers, fishermen and food processors in SY 2013-2014. Every dollar spent on local food generates up to an additional \$2.16 in economic activity, indicating school districts' local food purchases can lead to over \$1 billion in local economic activity. (USDA Farm to School Census 2015)

**23.6 million students** are eating healthier because they're engaged in food and agriculture education. (<u>USDA Farm to School Census 2015</u>)

### WHY THIS IS NEEDED

While communities have already benefited greatly from the USDA Farm to School Grant Program, demand for this highly impactful program significantly outweighs current funding. Since 2013, USDA has received more than 1,900 applications requesting over \$141 million, but was able to make only 437 awards from \$30 million available. Congress must build on the success of farm to school by strengthening the grant program's scope and providing \$15 million per year in mandatory funding.

# The Farm to School Act will accomplish the following goals:

- Increase annual mandatory funding for the USDA Farm to School Grant Program from \$5 to \$15 million, and increase the individual grant award maximum to \$250,000.
- Advance equity by prioritizing grant applications that engage beginning, veteran and socially disadvantaged farmers and serve diverse and high-need student populations.
- Fully include early care and education sites, summer food service program sites and after school programs.
- Increase access among Native and tribal schools to farm-fresh and traditional foods, especially from tribal producers.

#### Farm to School Act of 2019 (H.R. 3562, S. 2026) Sponsors

Senator Patrick Leahy (D-VT), Senator David Perdue (R-GA), Senator Sherrod Brown (D-OH), Senator Susan Collins (R-ME), Representative Marcia Fudge (D-OH) and Representative Jeff Fortenberry (R-NE)

### MORE DETAILS: FARM TO SCHOOL ACT OF 2019

#### Increase annual funding to \$15 million & increase grant award maximum to \$250,000.

Demand for the USDA Farm to School Grant Program is nearly five times higher than current mandatory funding. Funding the program at \$15 million annually will better support the high demand of this important program. Furthermore, increasing the individual grant award maximum to \$250,000 will better support grantees from state agencies, large school districts and other organizations in launching and establishing long-term, sustainable programs that benefit children, farmers and communities for years to come.

#### Advance equity by prioritizing grants that engage diverse farmers & serve high-need schools.

Communities with the least access to farm to school resources should have a competitive opportunity to benefit from the support of the USDA Farm to School Grant Program. The program must prioritize applications that engage beginning, veteran and socially disadvantaged agricultural producers, as well as those that serve diverse and high-need student populations, to ensure equitable access to its resources and the benefits that new farm to school efforts offer.

#### Fully include early care and education sites, summer food service sites & after school programs.

The scope of the grant program must include early care and education settings, as the first years of life are formative for developing healthy eating habits and farm to school starts kids on the right path. Additionally, the program's scope must also include summer food service program sites and afterschool programs, which provide meals to millions of children in low-income areas and ensure access to nutritious meals after school lets out.

### Increase access among tribal schools to traditional foods, especially from tribal producers.

Native American communities face disproportionately high rates of overweight, obesity and type 2 diabetes. Encouraging farm to school partnerships between tribal schools and tribal producers will increase consumption of nutritious traditional foods while also supporting Native farmers and ranchers.

#### WHAT IS FARM TO SCHOOL?

Farm to school is a common sense approach to child nutrition that empowers children and their families to make informed food choices while strengthening the local economy and contributing to vibrant communities. Farm to school implementation differs by location but always includes one or more of the following:

**Procurement:** Local foods are purchased, promoted and served in the cafeteria or classroom as a snack or taste-test.

**Education:** Students participate in educational activities related to agriculture, food, health or nutrition.

**School Gardens:** Students engage in hands-on learning through gardening.

# **BENEFITS: A WIN FOR EVERYONE**

Farm to school activities provide benefits to students, parents, schools, communities and food producers, including:

- Increases market opportunities for farmers, ranchers, fishers and local food producers and entrepreneurs.
- Increases children's consumption of fruits and vegetables.
- Supports community and economic development.
- Strengthens knowledge and attitudes toward agriculture, food, nutrition and the environment.
