

# FIBERSHED

Local Fiber, Local Dye, Local Labor

## **Fibershed Resources- Connecting children with local and regional fiber/textile systems:**

[Educational Curricula/Lesson plans](#) available on Fibershed's website. These curricula for children support an understanding of place, through the intersection of restoration education and material culture. We explore the concepts of having human needs met while caring for the natural systems on which we depend. 'Restoration Dye Gardens' for grades 1-5 includes a series of lessons leading to a native plant natural dye and simple hand-held weaving project.

Sourcing local fiber materials:
