

## 2019 WATER-WISE IRRIGATION MINI-GRANT APPLICATION

School Garden Network & Harmony Farm Supply are dedicated to water conservation in gardens!

Date:

School Name:

School Garden contact person and position at school:

Daytime phone:

Email:

Name of person completing this application and relationship to school:

Who will be in charge of installation and maintenance of irrigation systems?

Please provide a detailed map of your school garden. Include overall square footage. This map does not need to be to scale but it does need enough detail to design an adequate system. This map will be used for design purposes so please be as accurate as possible.

Make sure to include:

- Overall square footage and distance between water source and beds
- Size of garden beds to be watered
- Mark and include perennial beds with appropriate size

- Please note if native plants or drought tolerant plantings are in perennial beds.

**\*\*Please note that garden must have a pressured water line with a shut off valve and a 1-inch stub up in the garden to qualify for funding.\*\***

Drip system will be designed by irrigation specialists at Harmony Farm Supply (HFS). HFS & SGN will supply irrigation parts not to exceed \$400. With the huge discounts HFS offers to schools, most projects are completely covered by this mini grant.

Systems most often are designed to include valves and battery-operated timer installed in ground. SGN will work with school personnel and teen participating in our School Garden Apprenticeship program to install the irrigation system.

**SCHOOL GARDEN NETWORK IS NOT RESPONSIBLE FOR ANY REPAIRS OR MAINTENANCE TO THE SYSTEM ONCE INSTALLATION IS COMPLETE.**

Please include signature or attached letter that school maintenance is aware of the plan to tap into the main garden water line to install a drip irrigation system.

Maintenance personnel signature \_\_\_\_\_

School Principal approval \_\_\_\_\_

Schools will be notified if selected to participate in this program. SGN Project Manager will make arrangements to visit the school to review design. SGN Project Manager will assist in the installation of the irrigation system.
